

## RV-DYNAMIC-MNT RVIP-DYNAMIC-MNT INSTALLATION SHEET

### Bracket Installation

Fixings to mount the Dynamic Mount Pedestal will depend on the fixing surface. It is important to use adequate quality fixings to safely support an X-Series camera. Fixing slots on a 4" PCD provide clearance for 6 mm bolts.

### Connecting/mounting the Camera

Install the Flying Lead optionally through the central mounting tube or via the 20mm Gland entry point. Connect the Amphenol 7 way connector to the mating connector on the X-Series Camera. Once connected secure the Camera to the Dynamic mount with the fixings provided, as shown in Fig A.

Note: RV-DYNAMIC-MNT is only compatible with X-Series cameras fitted with a Dynamic Mount interface. These are specified by adding /DYNAMIC to the X-Series order code.

### Contents

- Dynamic Mount Bracket
- 10 metre Flying Lead
- 5mm Allen Key
- 4 off M6 x 25 fixings
- 4 off Nyloc Nuts
- 20mm Blanking Plug
- 20mm Cable Gland
