

### **RVK-STOR-08**

## Knight Stor 08™

## **Key Features**

- 8ch ONVIF NVR, ideal for small Retail
- Optimised for Redvision Cameras
- Up to 12TB HDD for continuous recording
- Up to 8MP recording
- 8ch PoE (802.3af) for easy connection
- Audio and Alarm I/O

- Point & Click PTZ Control
- HDMI & VGA Output, up to 4K display resolution
- RedVu GO Mobile App access
- RedVu Central Management System (CMS)
- Smart Search & Playback

#### KNIGHT STOR 08™ NVR

The Knight Stor 08<sup>™</sup> Network Video Recorder from Redvision offers stunning recorded images, coupled with ease of use, feature-rich user interface and a sturdy but sleek design that would fit into any office, retail or domestic environment. All of this packaged with high quality, reliability and solid, UK-based Technical Support that is synonymous with the Redvision name.

#### PoE – Plug and Play

The Knight-Stor-08<sup>™</sup> NVR utilises leading-edge technology to offer a high level of features and functionality, with low power consumption (<5W without HDD). Built-in Power over Ethernet (PoE) power (802.3at) for your Redvision cameras means simple plug and play experience.

#### **3D Positioning – Point and Click**

3D positioning control of your Redvision cameras, allows you to click and draw an area for the camera to pan, tilt and zoom to, in one swift movement, removing joystick overrun.

#### **ONVIF Compliant**

ONVIF-conformant platform allows a variety of cameras to be used with the NVR. Private protocol enhances the full benefit of using Redvision Professional cameras with the NVR, but any existing ONVIF cameras can also be accommodated. The NVR works with a range of camera resolutions, up to 8MP; giving a total flexibility in the system architecture.

#### Surveillance-Grade HDD Recording

12TB total storage means you won't miss a thing, all eight 1080p cameras can be recorded and real-time footage retained for up to 23 days. A choice of storage options is of course available, using top-quality surveillance-grade hard drive.

#### Smart Search & Playback

Smart Search makes finding events and activity for playback fast and easy. Mobile App access

from your iPhone, iPad or Android Smartphone gives you full control of your system and peace of mind out of hours. Alarm Inputs, Instant and Motion Detection recording options mean that you record only the important things, making the best use of your storage.

#### HD Display Output

High-resolution display output allows you to watch your system in a variety of display resolutions, up to 4K, offering both HDMI and VGA formats.

#### RedVu<sup>™</sup> CMS and RedVu GO<sup>™</sup> App

RedVu<sup>™</sup> can be used for video management at different monitoring scales. It supports centralised management, distributed deployment and multi-user remote access; an optimised solution for managing Knight-Stor<sup>™</sup> Network Video Recorders and Redvision cameras.

RedVu GO<sup>™</sup> mobile application allows simple connection to Redvision NVR's and Cameras, with live preview of up to 16 Channels and playback video preview of 4 channels. Alarm notifications are easily managed with multiple push notification event sliders to adjust.

#### Alarm Notifications

Multiple alarm notifications are available from the Knight Stor 08<sup>™</sup> NVR, covering General, Motion Detection, Video Loss, IVA, Alarm input, Abnormal alarm and Alarm output.

#### IVA Link to PTZ Preset

The Knight Stor 08<sup>™</sup> utilises the Intelligent Video Analytics (IVA) from Redvision cameras, with simple configuration and setup available directly from the NVR. The camera's IVA can be set to control a Redvision PTZ, allowing trip wire detection (or other IVA) to move a Redvision PTZ camera to a predefined preset, to better investigate the scene.
